Welcome Upland Game Bird Hunters!

Welcome to the Montana Fish, Wildlife & Parks (FWP) Upland Game Bird Enhancement Program (UGBEP). The purpose of this program is to enhance upland game bird populations on lands open to free public hunting. FWP partners with private landowners and other individuals, groups, and organizations to improve habitat on private and public lands. With nearly 460 active contracts, Montana landowners and conservation organizations are conserving and enhancing almost 355,000 acres of upland game bird habitat while providing nearly 645,000 acres for public upland game bird hunting.

The 2018 UGBEP Access Guide is current as of August 1, 2018. New habitat projects are contracted year-round. For electronic updates to this year's guide, check the FWP Hunt Planner for updates: <http://bit.ly/2rqa9JM>

How to Use this Guide

Obtaining landowners' permission to hunt upland game birds is required prior to hunting or entering any private land project area. Exception: Some projects allow walk-in game bird hunting only with no further permission needed.

UGBEP Project Maps found in this publication are intended only as a guide. It is every hunter's responsibility to know the land ownership of the area he or she intends to hunt and any land use restrictions that may apply there. Non-FWP information layers used to create the maps are from other agencies and may not be current, comprehensive, or accurate.

The UGBEP Projects Access Guide contains 2 key sections: (1) Regional Information Tables and (2) Maps. Together, these sections will help hunters locate project areas and the method used to obtain permission to hunt, when applicable. Every project found on the maps is labeled with a project number and is symbolized to indicate the type of permission needed prior to accessing the project area. A description of the symbols follow:

Private Lands Symbols

Black polygon with hatch marks: Landowner permission needed. Hunters can refer to the tables for the method to contact landowner.

Brown polygon with hatch marks: Walk-in game bird hunting, no further permission needed from the landowner.

Green circle: Project is located on land enrolled in Block Management. Refer to tables for Block Management Area information.

Public Lands Symbols

Brown triangle: Accessible public land, no permission is needed.

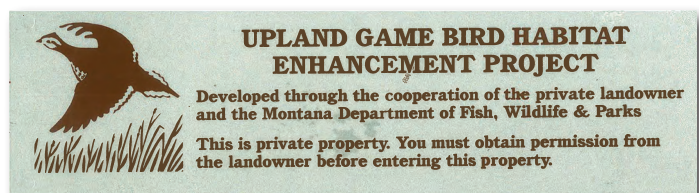

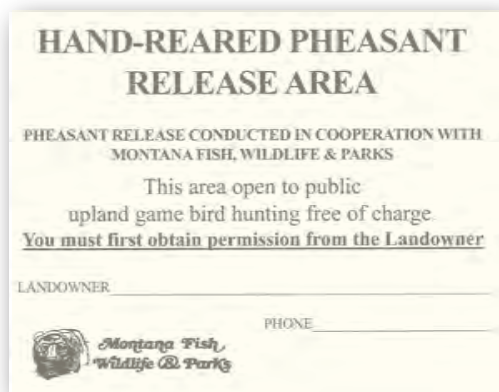

Orange triangle: Accessible public land, hunters need to contact agency for reservations.

The Map Index, located on the inside cover page, provides hunters with a statewide overview of project locations relative to Montana's counties. Grids containing UGBEP projects are labeled with the Map Page number. This number corresponds to the map page found in the Guide. Map Pages also contain greater detail about the project areas, including nearby roads, private land boundaries, projects located on public lands, or projects located on Block Management Areas. All projects are symbolized according to the type of permission needed and labeled with a project number(s) that corresponds to a tabular description in the Regional Information Tables.

Project numbers are located in the Regional Information Tables according to FWP's Wildlife Administrative Region. To locate the project number in the tables, use the Map Index to first determine in which Region the project is located, then refer to the Regional Information Tables that contain detailed project information, including the method to obtain permission to hunt, cooperator name, project termination date, project/enhancement types, access acreage, and associated Map Page. Hunters can also refer to the tables first to select a project they are interested in, then refer to the Map Page number to locate the project on the map.

Watch for these Signs

Helpful Tips

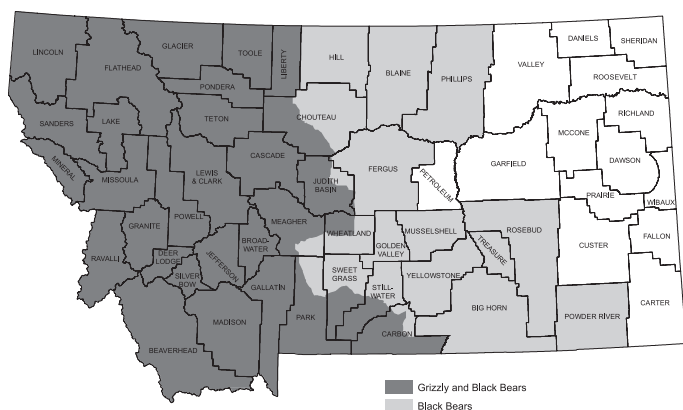

FWP wants to ensure landowners, hunters (and their dogs) have rewarding experiences through the UGBEP. The following tips are intended to provide hunters with some additional considerations.

Respect private lands. Possession of the maps found in the Guide does not constitute legal access to the private land enrolled in the UGBEP. Hunters must always obtain landowner's permission unless noted otherwise in the Guide.

Learn more about the various access opportunities Montana has to offer. Visit FWP's Interactive Hunt Planner at:

BE BEAR AWARE!

Protecting Our Hunting Heritage

Hunters must be ethical to ensure good landowner relations and future program success. Help preserve Montana's hunting heritage by abiding by these rules and behaviors:

- Treat the lands as if they were your own and act responsibly.
- Obey the safety zone concept even if not signed. Leave a buffer when hunting near, and never shoot towards buildings, homes, and livestock.
- Do not leave cleaned game remains near parking areas, roadways, or roadside ditches.
- No driving off road. All projects are walk-in only from established roads, signed access trails, or parking areas unless further permission is received from the landowner.
- Hunting season is harvest season, park only in areas that do not block gates or roads from passing farm equipment.
- No hunting or parking in unharvested grain fields.
- No littering. Please pick up your spent shot shells.
- Leave gates as they are found.
- Be aware of fire danger. Avoid parking in tall grasses, especially early in the season.
- Remember to thank landowners for enhancing habitat and providing hunting access!

FWP wants to hear your thoughts on the Upland Game Bird Enhancement Program. Please take a moment to participate in the UGBEP online survey at:

<http://fwp.mt.gov/ugbepHunterSurvey>

We look forward to hearing from you.

Farmers and Ranchers

On behalf of Fish, Wildlife & Parks, and all Montana hunters, we'd like to say "Thanks!" Thanks for providing habitat for Montana's public wildlife resources, and thanks for opening your gates to resident and nonresident hunters.

Upland Game Bird Enhancement Program Projects

The UGBEP provides financial assistance to cooperators interested in enhancing habitat for upland game birds. Below are descriptions of the more common types of projects. Pheasant releases are only conducted in areas with suitable habitat.

Aspen Regeneration

To improve long-term habitat productivity for ruffed grouse, old and dying aspen stands are rejuvenated through logging practices.

Grazing Management System

A rest-rotation grazing system provides undisturbed hiding cover on approximately 1/3 of the grazing system area each year. These projects are mostly geared toward sharp-tailed grouse, sage-grouse, and gray partridge but may also benefit pheasants.

Nesting Cover

Nesting cover projects are associated with the Conservation Reserve Program, in which UGBEP cost-shares or provides other incentives to the landowners to promote the use of beneficial grass mixes.

Pheasant Release

The goal of the pheasant release program is to establish or enhance pheasant populations. Pen-reared pheasants are released in habitats that can support pheasant populations.

Open Fields for Game Bird Hunters

Open Fields provides additional incentives to landowners to maintain CRP on their land. CRP provides important cover for Montana's game birds and other wildlife.

Habitat Management Lease

Habitat management leases focus on smaller, high value sites including riparian areas, old farmsteads, established shelterbelts, a mix of idle cover, or other productive habitats.

Shelterbelt

Shelterbelts are shrub and tree plantings designed to provide winter cover for pheasant, sharp-tailed grouse, and gray partridge.

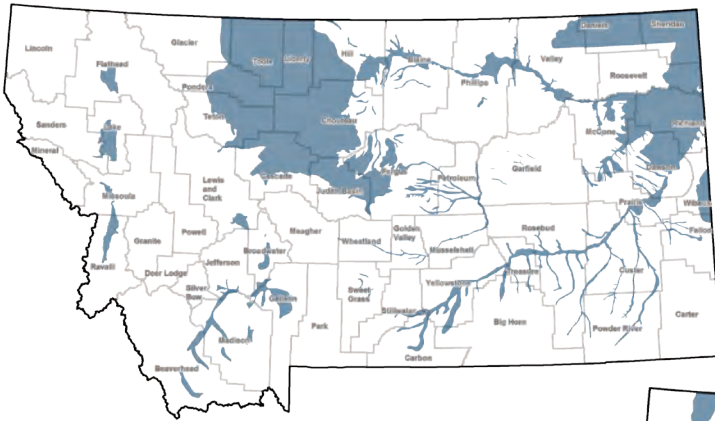

Winter Food or Cover Plot

Domestic grain plantings serve as a winter food source for pheasant and gray partridge, but sharp-tailed grouse may also benefit from these plots.

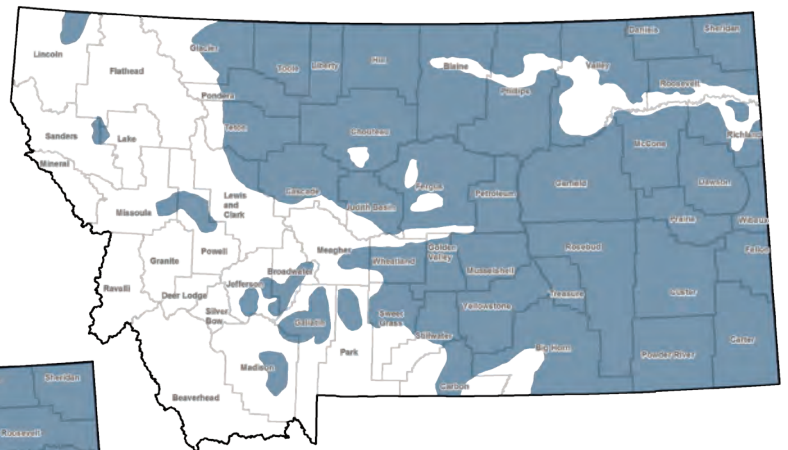

General Distribution of Montana's Game Birds

These maps show the general distribution of game birds found in Montana. For more information about these species, go to the Montana Field Guide at fieldguide.mt.gov.

Spruce Grouse

Upland Game Bird Field Care

Game meat tastes better when properly cared for and prepared. Some tips on ensuring you get the best out of your game birds:

- Promptly remove the entrails from all harvested game birds. This stops the chemical activity of digestive juices, reduces odor, and speeds the cooling process. If the birds can't be cleaned right away, keep them in the shade.
- Upland birds are difficult to pluck without ripping the skin. Dunk the birds in scalding water or pluck birds while they are still warm to make it easier.
- The body cavity of birds to be roasted should be thoroughly rinsed and dried before the birds are packaged. Trapped blood, which imparts a "wild" taste, can be drawn out of muscle tissue by soaking the birds overnight in a water-vinegar or a salt-water solution.

Excerpt from: "A Hunter's Guide to Southeastern Montana", FWP

No shooting/trespassing into safety areas around houses or buildings.
No hunting in unharvested crops fields or near cattle.

2018 Sunrise-Sunset Tables For Determining Hunting Hours

These tables, including adjustments for daylight savings time, are the official sunrise-sunset tables adopted by the Montana Fish, Wildlife & Parks Commission for hunting in Montana. Authorized hunting hours for the taking of upland game birds and falconry begin one-half hour before sunrise and end one-half hour after sunset each day of the hunting season. (Do not use other sources.)

ZONE 1: INCLUDES: Flathead, Granite, Lake, Lincoln, Mineral, Missoula, Ravalli and Sanders Counties
